For easy to update method of display, an LED sign tailored to the needs of a theme park or cinema complex makes a convenient method of communicating schedules, special offers, customer information or listings. With a range of character heights to suit readability over a distance to changing display colours and number of visible lines they make a flexible alternative to any conventional means of displaying information.

Coupled with your company branding an LED display fits in neatly with any corporate image to provide a professional and invaluable asset to any company profile.

Right: Bespoke 60mm single line Tricolour display showing "VIEWING AVAILABLE" as a default and a triggered message showing "VIEWING FULL"

Above: MS16/100-1L message display for Ascot Racecourse

Right: MS24/100-4L message display for Alton Towers Leisure Park, Northampton

OPTIONS

All entertainment displays are manufactured as Moving Message Alphanumeric Displays

Moving Message Alphanumeric Display – This is a 16 or 24 character, single line, 30mm character height display with the ability to display Text Messages in addition to the numerical information. The Moving Message Alphanumeric Display has all the functionality of a Standard **LEDsynergy** Alphanumeric Display, including:

Transition Functions – There are 15 attractive transitional functions including: - Appear, Wipe, Open, Lock, Rotate, Right, Left, Roll Up, Roll Down, Ping Pong, Fill Up, Paint, Fade In, Jump, Slide.

Tempo – This is the time duration that each page is displayed for. 9 different tempos are available.

Pre-Scheduling – Each page programmed into the display can be scheduled to display at a specific day, date & time.

Auto Centering – The text entered into the display is automatically centered, providing a symmetrical, visually appealing display.

Character Options – Upper and Lower Case letters, Bold characters, Enlarged characters, Flashing characters.

Real Time Clock & Calendar – Used to display the Date, Month, Day & Time on the display.

Back-up battery – No loss of memory or time in case of power failure.

Date and Time Displays – These are 45mm high 7 segment LED displays, used to display numerical information. When included in the design of the Queuing System, they display the Date and Time.

OPERATION

LEDsynergy entertainment Displays are easily programmable, with various methods of operation to suit almost any application.

Keyboard Operation

The simplest way to program a entertainment Display, is using the standard **LEDsynergy** RMSP-100 Infra-Red Keyboard. The keyboard is simply pointed at the display and the message is typed into the display.

PC Operation

LEDsynergy entertainment Displays can also be programmed from remote locations using PC's and Windows Compatible Software.

The displays can be connected to PC's in various ways:

- Connected directly to a PC's Serial Communication Port
- Via dial-up modem
- Over Ethernet TCP/IP network

Messages are edited/ composed on PC and then downloaded or sent to the display.

POPULAR COMMUNICATION OPTIONS *(Many others are available)*

RS232 – Connected directly to the serial communication port of a PC. The cabling is limited to a maximum of 50 meters between the PC and the display. RS232 is suitable for single display applications with short cable lengths.

RS485 – Connected to the serial communication port of a PC via a RS232 to RS485 converter. Suitable for use in connecting many signs together on the same cable with no conflicts, in electrically noisy environments.

Ethernet – Connected directly into a TCP/IP Ethernet network, and assigned its own IP address. Suitable for use where there is an existing network infrastructure.

Modem – Connected directly to a modem that answers an incoming call from the PC operator, and will disconnect after the message has been transmitted. Suitable for use where there is an existing telephone line and other communication options are unsuitable.

Others – including Pagers, Newswire, Radio Modems, Keypad, Fibre Optics, please contact us for a more detailed information.
